

TABLE OF CONTENTS

Module - 1

Chapter - 1 Introduction to Artificial Intelligence and Soft Computing (1 - 1) to (1 - 28)

1.1 The Concept of Artificial Intelligence (AI)	1 - 2
1.1.1 Introduction	1 - 2
1.1.2 Various Definitions of AI	1 - 2
1.1.3 The Foundation of AI	1 - 3
1.1.4 The Strong and Weak AI	1 - 3
1.1.4.1 Strong AI	1 - 3
1.1.4.2 Weak AI	1 - 4
1.1.5 What AI can do Today ?	1 - 4
1.1.5.1 Autonomous Planning and Scheduling	1 - 4
1.1.5.2 Game Playing	1 - 4
1.1.5.3 Autonomous Control	1 - 4
1.1.5.4 Diagnosis	1 - 4
1.1.5.5 Logistic Planning	1 - 4
1.1.5.6 Robotics	1 - 4
1.1.5.7 Language Understanding and Problem Solving	1 - 4
1.1.6 Human Vs Machine	1 - 5
1.1.6.1 Will Machine behave exactly as Human ?	1 - 5
1.1.6.2 Comparisons between Human and Machines	1 - 5
1.1.7 List of Expert Systems Influential in AI Field	1 - 5
1.2 AI Problem	1 - 6
1.3 The Underlying Assumption	1 - 6
1.4 What is an AI Technique ?	1 - 7
1.5 The Level of the Model	1 - 7
1.6 Criteria for Success	1 - 8
1.7 Some General References	1 - 8

1.8 AI Terms	
1.8.1 Agents and it's Environment	
1.8.2 The AI Terminology	
1.8.3 Architecture of Agent	
1.8.4 Schematic of AI's Agent Performing Action	
1.8.5 Role of An Agent Program	
1.8.6 Simple Example for Tabulation of a Agent	
1.8.7 The Weak and Strong Agent	
1.8.7.1 Weak Agent	
1.8.7.2 Strong Agent	
1.8.8 Rational Behaviour and Omniscience	
1.8.8.1 Rational Agent	
1.8.8.2 The Good and the Bad Agent	
1.8.8.3 Omniscience, Learning and Autonomy	
1.8.9 Agent and it's Environment	
1.8.9.1 Agent Description	
1.9 The Environments	
1.9.1 Nature of Environment	
1.9.2 Types of Task Environment	
1.9.2.1 Fully Observable Vs Partially Observable	
1.9.2.2 Deterministic Vs Stochastic	
1.9.2.3 Episodic Vs Sequential	
1.9.2.4 Static Vs Dynamic	
1.9.2.5 Discrete Vs Continuous	
1.9.2.6 Single Agent Vs Multiagent	
1.9.2.7 Complexity Comparison of Task Environment	
1.9.3 More Types of Task Environment	
1.10 Different Types of Agents	
1.10.1 Intelligent Agent	
1.10.2 Different Forms of Agents : (Types of Agents)	

1.10.2.1 Agent Type 1	1 - 18
1.10.2.2 Agent Type 2	1 - 19
1.10.2.3 Agent Type 3	1 - 20
1.10.2.4 Agent Type 4	1 - 21
✓ 1.10.3 The Learning Agent	1 - 21
1.10.3.1 Components of Learning Agent ...	1 - 22
1.10.4 More Types of Agents	1 - 23
1.11 Designing an Agent System	1 - 23
1.11.1 The Steps in Designing an Agent	1 - 23
✓ 1.11.2 Examples of Agent Types and Their PEAS Description According to Their Uses	1 - 24
1.11.3 The Detail Example of PEAS	1 - 25
1.12 One Final Word	1 - 26
1.13 Soft Computing	1 - 26
1.13.1 Soft Computing Concept	1 - 26
1.13.2 Various Types of Soft Computing (Soft Computing Methodologies)	1 - 26
1.13.3 Application of Soft Computing	1 - 27
✓ 1.13.4 Soft Computing Versus Hard Computing ..	1 - 27
1.14 University Questions with Answers	1 - 28

Module - 2

Chapter - 2 Problem Solving Agent and Uniformed Search (2 - 1) to (2 - 34)

2.1 Problem Defining and Solving Problem	2 - 2
2.1.1 What is Problem Solving ?	2 - 2
2.1.2 Well Defined Problems	2 - 2
2.1.3 Problem Formulation Types	2 - 4
2.1.4 Solving the Problem	2 - 4
2.1.5 Problem Solving Agents	2 - 5
2.1.5.1 Approach of Problem Solving Agent ..	2 - 5
2.1.5.2 Steps in Problem Solving	2 - 5
2.1.5.3 Algorithm	2 - 5
2.1.5.4 For Example	2 - 6
2.2 State Space Search	2 - 6

2.2.1 Construction of State Space	2 - 6
2.2.2 Terminology used in Search Trees	2 - 6
2.2.3 Node Representation in a Search-Tree	2 - 7
2.2.4 The Node Searching and Expansion Algorithms	2 - 8
2.2.4.1 Algorithm Tree Search	2 - 8
2.2.4.2 Algorithm Expand Node	2 - 8
2.2.5 Measuring Problem Solving Performance ..	2 - 8
2.3 State Space Search Strategies	2 - 9
2.3.1 There are Two Basic Types of Search Strategies	2 - 9
✓ 2.3.2 Uninformed Search Strategies	2 - 9
2.3.2.1 Breadth-First Search	2 - 9
2.3.2.2 Uniform Cost Search	2 - 10
2.3.2.3 Depth-First Search	2 - 11
2.3.2.4 DFS [Depth First Search]	2 - 11
2.3.2.5 Depth-Limited Search (DLS)	2 - 12
2.3.2.6 Iterative-Deepening Depth-First Search (IDDFS)	2 - 13
2.3.2.7 Bidirectional Search	2 - 14
2.4 The Repeated States	2 - 15
2.4.1 Avoiding Repeated States	2 - 15
2.4.2 Serious Problems Caused due to Repeated States	2 - 15
2.4.3 Example of State Space that Generate an Exponentially Larger Search Tree ...	2 - 15
2.4.4 Algorithm that can Avoid Repeated States (Algorithms that Forget their History are Sure to Repeat the States.)	2 - 16
2.5 Searching with Partial Information	2 - 17
2.5.1 Sensorless Problems (Conformant Problems)	2 - 17
2.5.2 Contingency Problem	2 - 17
2.5.3 Extreme Case of Contingency Problem ...	2 - 18
2.6 Issues in the Design of Search Problem	2 - 18
2.6.1 Issues in Engineering Design	2 - 18
2.6.1.1 Design Synthesis	2 - 18
2.6.2 Issues in Design of Search Program	2 - 19

2.7 AI Problem Characteristics	2 - 19
2.7.1 Problem Characteristics	2 - 19
2.7.2 Example Problems and their Characteristics	2 - 21
2.8 Example Problems	2 - 27
2.8.1 Toy Problem	2 - 27
2.8.2 Real World Problem	2 - 27
2.8.3 Problem Formulation for Toy Problems ..	2 - 27
2.8.4 Real-World Problem Examples	2 - 30
2.9 University Questions with Answers	2 - 32
Chapter - 3 Informed Search Techniques Heuristics (3 - 1) to (3 - 22)	
3.1 The Searching Techniques	3 - 2
3.1.1 Introduction to Informed Search	3 - 2
3.1.2 Generate-and-Test	3 - 2
3.1.3 Best First Search Technique (BFS)	3 - 2
3.1.4 Heuristic Function	3 - 3
3.1.5 Greedy Best First Search (GBFS)	3 - 3
3.1.6 A* Search	3 - 4
3.1.7 Memory Bounded Heuristic Search	3 - 5
3.1.7.1 Recursive Best First Search (RBFS) ..	3 - 5
3.1.7.2 MA*	3 - 6
3.1.8 Problem Reduction with AO* Algorithm ..	3 - 6
3.1.9 How to Search Better ?	3 - 7
3.1.10 Heuristic Functions and Their Nature	3 - 7
3.1.10.1 Accuracy of Heuristic Function	3 - 7
3.1.10.2 Designing Heuristic Functions for Various Problems	3 - 7
3.1.10.3 The Domination of Heuristic Function	3 - 10
3.1.10.4 Admissible Heuristic Functions	3 - 10
3.1.11 Learning Heuristic from Experience	3 - 10
3.2 Local Search Algorithms and Optimization Problems	3 - 11
3.2.1 Local Search Algorithms	3 - 11
3.2.2 Hill Climbing Search	3 - 12
3.2.2.1 Algorithm for Hill Climbing	3 - 12

3.2.2.2 Problems with Hill Climbing	
3.2.2.3 Solving Problems Associated with Climbing	
3.2.2.4 Example for Local Search	
3.2.2.5 Advantages of Hill Climbing	
3.2.2.6 Variations of Hill Climbing	
3.2.3 Simulated Annealing Search	
3.2.4 Local Beam Search	
3.2.5 Stochastic Beam Search	
3.2.6 Genetic Algorithms	
3.2.6.1 Term used in Genetic Algorithm	
3.2.6.2 Working of a Genetic Algorithm	
3.2.6.3 Example : 8 Queens Problem Fitness	
3.2.6.4 Optimization using Genetic Algorithm	
3.3 Local Search in Continuous Spaces	
3.3.1 Search and Evaluation Theory	
3.3.2 Problems Associated with Local Search	
3.3.3 Constrained Optimization Problem	
3.4 Handling Unknown Environments	
3.4.1 Online Search Agents	
3.4.2 Solving Online Search Problems	
3.4.3 Online Local Search	
3.4.4 Learning Real Time A*	
3.4.5 Learning in Online Search	
3.5 University Questions with Answers	

Module - 3

Chapter - 4 Representating Knowledge using Rules - Predicate Logic (4 - 1) to (4 - 5)

4.1 Introduction	
4.1.1 Logic for Knowledge Representation and Reasoning	
4.1.2 Representation Languages	
4.2 Logic	

4.2.1	Terms used in Knowledge Representation	4 - 2	4.4.11.2	Existential Quantifier (\exists)	4 - 14
4.2.2	Soundness and Completeness of Logic	4 - 3	4.4.11.3	Truth Values of First Order Logic Expressions Containing Quantifiers	4 - 15
4.3	Propositional Logic	4 - 3	4.4.11.4	The Nested Quantifiers	4 - 15
4.3.1	Characteristic of Propositional Logic	4 - 3	4.4.11.5	Relationship between \forall and \exists	4 - 15
4.3.2	Drawbacks of Propositional Logic	4 - 3	4.4.11.6	Equality	4 - 15
4.3.3	Syntax for Propositional Logic	4 - 3	4.4.11.7	Properties of Quantifiers	4 - 15
4.3.3.1	Propositional Calculus Sentence	4 - 4	4.4.11.8	The Examples Bank	4 - 16
4.3.3.2	Connectives	4 - 4	4.5	Resolution	4 - 17
4.3.3.3	Grouping of Symbols in Propositional Logic	4 - 5	4.6	Procedural vs Declarative Knowledge	4 - 27
4.3.3.4	Forming a Legal Sentence in Propositional Logic	4 - 5	4.6.1	Difference between Procedural and Declarative	4 - 28
4.3.3.5	Formal Grammar for Propositional Logic	4 - 5	4.7	First Order Logic	4 - 28
4.3.3.6	Inference in the Knowledge Base	4 - 6	4.7.1	Using First Order Logic for Knowledge Base	4 - 28
4.3.4	Semantics for Propositional Logic	4 - 6	4.7.2	The Kinship Domain	4 - 29
4.3.4.1	Interpretation of Propositions	4 - 6	4.7.3	Number, Sets and Lists	4 - 29
4.3.4.2	Computation of Truth Values	4 - 7	4.7.4	The Wumpus World Represented using First Order Logic	4 - 30
4.3.4.3	Truth Table	4 - 7	4.7.4.1	Wumpus World Revisited	4 - 30
4.3.4.4	Validity	4 - 8	4.7.4.2	Reasoning in Wumpus World using First Order Logic	4 - 30
4.3.4.5	Satisfiability	4 - 8	4.7.5	Synchronic and Diachronic Sentences	4 - 30
4.3.4.6	The ISA Relationship	4 - 8	4.7.6	Synchronic Rules for Inferencing	4 - 30
4.3.4.7	Computable Functions and Predicates	4 - 9	4.7.6.1	Diagnostic Rules	4 - 30
4.4	First Order Logic - [Predicate Logic]	4 - 9	4.7.6.2	Causal Rules	4 - 30
4.4.1	Introduction to First Order Logic	4 - 9	4.7.6.3	Model Based Reasoning Systems and Diagnostic Reasoning Systems	4 - 31
4.4.2	Properties of First Order Logic	4 - 10	4.8	Inference in First Order Logic	4 - 31
4.4.3	First Order Logic-Extension to Propositional Logic	4 - 11	4.8.1	Inferencing in First Order Logic	4 - 31
4.4.4	Variations of First Order Logic	4 - 11	4.8.2	Definition of Various Terms used in Inference Theory	4 - 31
4.4.5	Characteristics of Logic	4 - 11	4.8.3	Inference Rules	4 - 32
4.4.6	Formal Languages and their Ontological and Epistemological Commitments	4 - 11	4.8.4	Reducing First Order Logic Inferences To Propositional Inferences	4 - 33
4.4.7	Higher-Order Logic	4 - 11	4.8.5	Concept of Lifting	4 - 34
4.4.8	Syntax for First Order Logic	4 - 11	4.8.6	Unification	4 - 34
4.4.9	Sentence in First Order Logic	4 - 12	4.8.7	Storage and Retrieval of Data from Knowledge Base	4 - 37
4.4.10	Semantic of First Order Logic	4 - 13			
4.4.11	Quantifiers	4 - 14			
4.4.11.1	Universal Quantifier (\forall)	4 - 14			

4.8.8	First Order Definite Clauses	4 - 38
4.8.9	Inferencing Algorithm for First Order Logic	4 - 38
4.8.9.1	Forward Chaining (Lifted Forward Chaining)	4 - 38
4.8.9.2	Backward Chaining (Lifted Backward Chaining)	4 - 41
4.8.9.3	Forward Chaining Vs Backward Chaining	4 - 42
4.8.10	Logic Programming - Prolog (Programming in Logic)	4 - 43
4.8.11	Resolution	4 - 43
4.8.12	Dealing with Equality	4 - 51
4.8.13	Theorem Provers (Automated Reasoners)	4 - 52
4.9	University Questions with Answers	4 - 53
Chapter - 5 AI Planning (5 - 1) to (5 - 36)		
5.1	Planning in Classical Environment	5 - 2
5.1.1	Difficulties in Planning Problem	5 - 2
5.1.2	The Comparison between Problem Solving and Planning	5 - 2
5.1.3	The Planning Problem [Using STRIPS Language]	5 - 2
5.1.4	Representation of Planning Problem	5 - 3
5.1.5	Searching for Solution for Planning Problem	5 - 5
5.1.5.1	Forward State-Space Search (Progression Planner)	5 - 5
5.1.5.2	Backward State Space Search (Regression Planner)	5 - 6
5.1.5.3	Heuristic Function for State - Space Search	5 - 8
5.2	Planning Languages - STRIPS	5 - 8
5.3	Blocks World	5 - 12
5.4	Goal Stack Planning	5 - 13
5.5	Partial Order Planning	5 - 15
5.5.1	Partial Order Planner	5 - 15
5.5.2	Implementation of Partial Order Planner	5 - 16

5.5.3	Search Problem Formulation for Partial Order Planner	
5.5.4	A Partial Order Planning Example	
5.5.5	A Solution Procedure by Partial Order Planning	
5.5.6	Partial Order Planning with Unbound Variable	
5.5.7	Heuristics for Partial Order Planning	
5.6	Planning Graphs	
5.6.1	Structure of Planning Graph	
5.6.2	Construction of Planning Graph	
5.6.3	Use of Planning Graphs in Designing Heuristic Functions	
5.6.4	The Graphplan Algorithm	
5.7	Planning in Real World	
5.7.1	What does Planning Involve ?	
5.7.2	Search in Planning	
5.7.3	Components of a Planning System	
5.8	Goal Stack Planning	
5.9	Non-linear Planning using Constraint Posting	
5.10	Hierarchical Planning	
5.11	Other Planning Techniques	
5.12	University Questions with Answers	

Module - 4

Chapter - 6 Fuzzy Logic (6 - 1) to (6 - 10)

6.1	Fuzzy Set Theory	
6.2	Fuzzy Logic	
6.3	Fuzzy Inference Systems	
6.3.1	Fuzzy Inference Systems Process	
6.3.1.1	Fuzzy "or"	
6.3.2	Fuzzification	
6.3.3	Defuzzification Mechanisms	

Module - 5

Chapter - 7 Artificial Neural Network (7 - 1) to (7 - 34)

7.1 Introduction to Neural Network	7 - 2
7.1.1 Neural Networks	7 - 2
7.1.2 Brief History of Artificial Neural Networks	7 - 2
7.1.3 The Biological Neuron Vs Artificial Neuron	7 - 2
7.1.4 Basic Components of ANN	7 - 3
7.1.5 Basic Mc-culloh-Pit's Model	7 - 4
7.2 Neural Net Architecture and Learning Neural Net	7 - 6
7.2.1 Neural Net Architecture	7 - 6
7.2.2 Perceptrons	7 - 9
7.2.3 Backpropagation	7 - 14
7.2.4 Delta Learning Rule (A Supervised Learning)	7 - 18
7.2.5 Recurrent Networks	7 - 19
7.2.5.1 Boltzmann Machines	7 - 19
7.2.5.2 Fully Connected Networks	7 - 20
7.2.5.3 A Layered Network	7 - 21
7.2.5.4 Modular Neural Networks	7 - 21
7.2.5.5 Hopfield Network	7 - 21
7.2.6 Applications of Neural Networks	7 - 23
7.2.7 Learning Process	7 - 25
7.2.7.1 Introduction to Learning Techniques	7 - 25
7.2.7.2 Transfer Function	7 - 26
7.2.8 Distributed Representations	7 - 26
7.2.9 The Connectionist AI and Symbolic AI	7 - 30
7.3 Self Organizing Map (SOM)	7 - 32

Module - 6

Chapter - 8 Expert System (8 - 1) to (8 - 40)

8.1 Hybrid Approach - Fuzzy Neural System	8 - 2
8.2 Expert Systems	8 - 2

8.2.1 Expert Systems	8 - 2
8.2.1.1 Definition of Expert System	8 - 2
8.2.1.2 Common Sense Reasoning	8 - 3
8.2.1.3 Why to Use an Expert System ?	8 - 3
8.2.1.4 Is Expert System Feasible ?	8 - 4
8.2.1.5 Advantages and Disadvantages of Expert System	8 - 4
8.2.1.6 Limitations of ES	8 - 4
8.2.1.7 The Success Factors of ES	8 - 5
8.2.2 Expert System Architecture	8 - 5
8.2.3 Expert System Shell	8 - 9
8.2.4 Explanation	8 - 9
8.2.5 Knowledge Engineering	8 - 13
8.2.5.1 Knowledge and its Meaning	8 - 13
8.2.5.2 Knowledge Acquisition	8 - 14
8.2.5.3 Knowledgebase (KB) and Building Knowledgebase	8 - 17
8.2.5.4 Knowledge Engineer	8 - 18
8.2.5.5 Domain Experts	8 - 18
8.2.5.6 Knowledge Representation	8 - 19
8.2.5.7 Inference Engine	8 - 21
8.2.6 Building Expert System	8 - 22
8.2.7 Application Areas of Expert System	8 - 24
8.2.8 Early Expert Systems	8 - 24
8.2.9 Expert System Case Study	8 - 25
8.2.9.1 MYCIN Case Study	8 - 25
8.2.9.2 Prospector	8 - 25
8.2.9.3 XCON / R1	8 - 26
8.2.9.4 DART	8 - 27
8.2.10 Expert System Example (Design and Implementation)	8 - 27

8.3 University Questions with Answers

Solved MU Question Papers (S - 1) to (S - 12)
